

EQUIPMENT & PARTNERSHIP

CSXT Intermodal works collaboratively with over 500 transportation providers, or "channel partners." If you have a current relationship with a transportation company, the chance is good we already work with them. If you don't, we can provide a list of companies and contacts that can connect your company with ours, and begin the process of doing business with CSXT Intermodal.

Working through channel partners, CSXT Intermodal moves a variety of equipment including rail asset, (rail-owned containers) and private asset (channel partner-owned) containers. Below are some types of equipment we move, including both domestic (53') and international (20', 40') equipment.

UMAX CONTAINER (Domestic)

53-foot, network-based intermodal containers
Expanded access to markets across North America through connections with the Union Pacific
Fleet of more than 40,000 containers
Ramp-to-ramp and door-to-door service

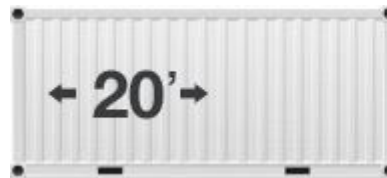

CSXU CONTAINER (Domestic)

53-foot, network-based containers
Expanded access to markets across North America through connections with the BNSF
Door-to-door service

PRIVATE 53' CONTAINER (Domestic)

53-foot privately owned containers
Includes both refrigerated (reefer) and dry containers
Access to CSXT domestic network
Connectivity to all major railroads

PRIVATE 20' AND 40' CONTAINERS (International)

20' and 40' privately owned containers
Access to CSXT international network
Connectivity to all major railroads
CSXT serves all major Eastern ports either on-dock or near-dock

PRIVATE REFRIGERATED TRAILER (Domestic)

Includes both refrigerated (reefer) and dry trailers
Access to Trailer on Flat Car (TOFC) network
Connectivity to all major railroads
